

Your first CRM, built around *how* *you work.*

The brand system for CRM From Within: one identity for the hands-on service today and the self-builder vision it is creating.

THE BELIEF

The useful CRM already
begins *inside the
company.*

CRM From Within learns how a small company follows leads, customers and follow-up, then builds the first useful CRM around that work. Customers leaving an existing CRM can add paid migration and deeper customization.

Start with the work.
Build what fits.

Turn spreadsheets, inboxes and memory into one clear system. Improve it with the people who use it.

PRIMARY PROMISE

Your first CRM, built around how you work.

CURRENT OFFER

A hands-on first CRM build, handled end to end.

The primary buyer has no CRM—and is tired of losing the thread.

BEFORE

Scattered

Leads, customer history and follow-up live in spreadsheets, inboxes, chat and people's heads.

DURING

Seen and understood

The build begins with how the team already sells, delivers and serves customers—not a blank configuration screen.

AFTER

In control

The system removes work, reflects the company's own process and remains owned by the customer.

The promise must always answer

Where do we begin?

Will the team use it?

Can you fit our work?

Who owns the software?

Is our data safe?

Can you move old CRM data?

Primary audience

Founders, CEOs and commercial or operations leaders at SMEs that do not yet have a CRM. They are relying on spreadsheets, inboxes, chat and memory.

Secondary audience: SMEs that want out of an existing CRM. Build the replacement first; offer migration and customization as paid services.

Lead with the first useful CRM. Keep migration as a visible second path.

CATEGORY	First CRM built around the company
CURRENT OFFER	A paid, hands-on first CRM build for approximately five reference customers
HERO	Your first CRM, built around how you work.
BRAND IDEA	The CRM starts inside your company—not inside a generic template.
ONE SENTENCE	We learn how your company follows leads, customers and follow-up, build the first useful CRM around that work and improve it with your team.
WHY NOW	The first manual builds can create useful CRMs now while teaching the future self-builder what good looks like.
PROOF	10+ years in CRM and automation. More than 450 Swedish companies served through FunnelBud.
FIRST ACTION	Use the conversational planner to see the first workflow that belongs in the customer’s CRM.

Same idea, written naturally in each language.

ENGLISH

Your first CRM, built around how you work.

Primary promise

The CRM starts inside your company—not inside a generic template.

Brand idea

See where your first CRM should begin.

Primary action

Already have a CRM? Build the replacement first, then move the data.

Secondary path

You own the CRM, code and data.

Ownership answer

CRM From Within

Company and product brand

SVENSKA

Ditt första CRM, byggt runt hur du arbetar.

Primärt löfte

CRM-systemet börjar i ert företag—inte i en generell mall.

Varumärkesidé

Se var ert första CRM ska börja.

Primär handling

Har ni redan ett CRM? Bygg ersättaren först och flytta sedan datan.

Sekundär väg

Ni äger CRM-systemet, koden och datan.

Svar om ägande

CRM From Within

Företags- och produktnamn

Ambitious about the destination. Calm and concrete about the next step.

EXACT, NOT TECHNICAL

Name the real action: observe usage, remove work, build, migrate, train and improve. Explain internal methods only when they add trust.

WARM, NOT CUTE

Talk like an experienced operator who understands people. Avoid playful AI language, mascots and exaggerated friendliness.

AMBITIOUS, NOT GRANDIOSE

State the larger belief clearly, then connect it to the first CRM workflow the customer needs today.

CONFIDENT, NOT ABSOLUTE

Use proof, ownership and process. Do not promise impossible timelines, perfect automation or automatic business results.

Say this

We start with one useful improvement in your current setup. Your team gets value immediately while we learn how the work really happens.

Do not say this

Our revolutionary autonomous AI platform transforms your entire revenue engine with seamless next-generation intelligence.

The system adapts around one distinct company core.

The open frame is structured but not closed. It protects the company's operating logic while leaving room for continuous change. The coral core stays specific, warm and unmistakably central.

Adaptive frame

Company core

Open future

Strong at 16 px

The symbol is not a literal C, plug, portal or AI icon. Those readings may appear, but the controlled meaning is always "the system fits the company." Use the lockup when the audience may not know the name.

LOGO SYSTEM

Primary lockup on Warm Paper, Cream or white.

Reverse lockup on Within Ink or dark photography.

Clear space

Keep at least one coral-core height around every side of the mark or lockup.

Minimum size

Mark: 16 px digital or 5 mm print.
Lockup: 120 px digital or 32 mm print.

Small spaces

Use the dark square icon for avatars, favicons and app icons. Do not force the wordmark in.

One color

Use the monochrome SVG only when production cannot reproduce the core colors.

Never: stretch, rotate, add glow, add a gradient, recolor individual parts, put the mark in another shape, reconstruct it with text, or return to the CN monogram.

COLOR

Warm trust first. Signal only what matters.

 Within Ink #102B2C Primary text, dark fields	 Warm Paper #F4F1E9 Primary background	 Signal Mint #B9F6CA Progress, proof, safe states	 Core Coral #FF7048 Actions, emphasis, company core
 Paper on Ink 13.25:1	 Ink on Mint 12.18:1	 Ink on Coral 5.46:1	 White on Coral 2.74:1 - do not use

Ratio: aim for roughly 80% Paper/Cream, 15% Ink and 5% Mint/Coral. Dark sections can invert this, but coral remains rare.

Accessibility: Within Ink is the default text color on Paper, Mint and Coral. White is for Ink and Deep Evergreen only.

TYPE AND LAYOUT

GEORGIA / EDITORIAL DISPLAY

Built around
how you work.

Use for headlines, key statements and pull quotes. Keep line lengths short. Sentence case only.

GEIST SANS / OPERATIONAL CLARITY

We learn how your company really works.
Use Geist Sans for body copy, navigation, buttons, forms, tables and every system interface.

GEIST MONO / SMALL SYSTEM LABELS

DISPLAY	48-78 px / 0.98-1.05 line height
SECTION	32-56 px / 1.0-1.1 line height
BODY	16-20 px / 1.5-1.7 line height
LABELS	10-12 px / 700-800 weight / tracked

Layout: Use generous margins, visible alignment and one dominant idea per screen. Prefer bordered modules and process paths to floating cards. Do not fill empty space with decoration.

Show real work and clear systems. Never make “AI” the visual subject.

PHOTOGRAPHY

Documentary and specific

Show real people in their working context, natural light and honest environments. Avoid staged laptop smiles and futuristic control rooms.

DIAGRAMS

Processes with a point

Use clean paths, modules and one warm core. Every line should help explain a decision, handoff or version.

ICONS

Simple and structural

Use 1.5-2 px line icons with rounded joins. No mixed icon styles, 3D icons, emoji or decorative tech symbols.

WORK

BUILD

USE

IMPROVE

One coherent system across the website, social profiles and founder-led outreach.

The image displays three ready-to-use assets for CRM From Within:

- Website Hero Section:** A light beige rectangular asset. On the left, it features the CRM From Within logo (a green 'C' with an orange square) and the text "CRM From Within". Below this is the headline "Your first CRM, built around how you work." in a large, dark serif font. Underneath the headline is a sub-headline: "Turn spreadsheets, inboxes and memory into one CRM shaped around your company." At the bottom, there are three rounded buttons: "STARTS WITH YOUR WORK" (dark grey), "OWNED BY YOU" (green), and "KEEPS IMPROVING" (light grey). On the right side of the hero section is a large, dark blue rounded square containing a large, stylized logo made of a green 'C' and an orange square.
- Social Media Profile Picture:** A dark blue rounded square containing a large, stylized logo made of a green 'C' and an orange square, matching the one in the hero section.
- One-pager Flyer:** A light beige rectangular asset. At the top left is the CRM From Within logo. The main text reads: "Your first CRM should start with *how your company actually works.*" in a mix of serif and italicized serif fonts. On the right side, there is a small line graph icon with three data points. At the bottom, there are two small footnotes: "crmfromwithin.com/en" on the left and "CRM FROM WITHIN" on the right.

Below these assets are three white rounded rectangular boxes with rounded corners, each containing a heading and a description:

- PROFILES:** LinkedIn and X avatars plus platform-safe banners.
- SHARE:** Website open-graph card and English/Swedish launch posts.
- SELL:** English/Swedish one-pagers, presentation cover, proposal cover and assessment cover.

Use the smallest asset that moves the conversation forward.

1

Cold visitor

Website hero, first-CRM story, proof and conversational starting-point plan.

3

Warm introduction

Send the matching one-pager, then point to the assessment rather than attaching a long deck.

5

Qualified opportunity

Return the plan in the branded template with one concrete first workflow.

7

Daily correspondence

Use the lightweight HTML signature. Never turn every email into a banner ad.

2

LinkedIn discovery

Company avatar, cover and one founder-led launch post in the reader's language.

4

First meeting

Use the presentation cover and website process. Spend the meeting on their workflow, not our slides.

6

Commercial discussion

Use the proposal cover and repeat the build scope, ownership and—only when relevant—the paid migration path.

8

New proof

Replace generic explanation with real outcomes as customers approve case studies.

Do not overbuild marketing before evidence.

Paid-ad systems, event collateral, merchandise and a large image library can wait. The first approximately five reference customers should teach us which proof, industry examples and objections deserve permanent assets.

Keep the identity stable. Let customer evidence improve the message.

The name, Coremark, primary colors, typography and brand architecture are frozen. Change them only when real customer behavior reveals a material problem.

Owner: CRM From Within

Primary source: this guide and the SVG masters in the brand kit

Review trigger: evidence from sales conversations, plans, customer use or accessibility - not novelty
